

## KMH - Karver internal mast Lock

- Same KFH proven locking technology : reliability & efficiency
- No lock strope bullet = No wearing parts & no need to change them
- No trip line. You only use your halyard to lock & unlock
- The removable cover gives you an easy access to the internal mechanism
- It's possible to unlock the mechanism from this easy access
- The cover is customizable (carbon, white, flashy colors, wooden aspect, ...)
- Round head pin design allows more angle flexibility
- Integrated & secured T bone
- Electronic position sensor available (option)
- Compact & Light
- No swiveling function : Use a KFH external lock to get a lock & a swivel on the same product

*All models use Stainless steel frame.*

*Titanium frame is only available with 3D printing technology (to quote)*
